

VIGON® US

Water-based, alkaline defluxing agent for dip tank processes

VIGON® US is a water-based cleaning agent specifically developed for the use in ultrasonic, spray-under-immersion and centrifugal cleaning equipment. Based on the MPC® Technology, VIGON® US removes all types of flux residues from electronic assemblies, flip chip packages and CMOS.

Areas of application – PCBA Defluxing

Advantages compared to other cleaners

- Specifically designed for the use in dip tank systems.
- Works exceptionally well in capillary spaces and is suitable for under low standoff component cleaning.
- Can be easily rinsed without leaving residues on the surface and provides low ionic contamination of cleaned parts.
- Its high bath loading capacity ensures an extended bath life and low maintenance cost.
- Has no flash point and does not require explosion proof equipment.
- Ensures a void-free underfill by removing all tacky fluxes from Flip Chips/CMOS.
- Improves the image resolution/reduces pixel defects due to particle removal from CMOS image sensors.

Process Steps

Cleaning Process	Parts	1. Cleaning	2. Rinsing	3. Drying
Dip tank (Ultrasonic, Spray-under-immersion)	PCBAs (Flip Chip, CMOS)	VIGON® US	DI-water	Hot air or circulating air
Centrifugal	PCBAs (Flip Chip, CMOS)	VIGON® US	DI-water	Hot air

Independent Test Center - Largest choice of leading machines, chemistry & analytics

Machine Test Center

Analytical Center

Visit our Machine Test Center and clean your electronic assemblies in cleaning machines of leading international equipment suppliers.

Your benefits:

- You are introduced to the cleaning machines & you clean your PCBAs under production conditions supported by your ZESTRON process engineer
- You check the cleaning results immediately on site (ROSE, optionally IR, IC, SEM/EDX etc.) for maximum comparability & result transparency
- You receive a process guarantee including detailed process parameters for the machine/cleaner combination that we recommend

Contact ZESTRON's process engineers for cleaning trials:

Technical Data*

Density	(g/ccm) at 20°C/68°F	0.99
Surface tension	(mN/m) at 25°C/77°F	30.8
Boiling point	°C/°F	165 - 212°C / 329 - 414°F
Flash point	°C/°F	None until boiling
pH value	10g/l H ₂ O	11.3
Vapor pressure	(mbar) at 20°C/68°F	Approx. 19
Cleaning temperature	°C/°F	40 - 60°C / 104 - 140°F
Solubility in water		Soluble
Application concentration ¹	Concentrate	15 - 30 %
HMIS Rating	Health-Flammability-Reactivity	0 - 0 - 0

* Please note that the following information represents VIGON® US at 20 % concentration.

¹ The concentrate of VIGON® US has to be diluted in DI-water.

Product Features & Cleaning Standards

 <p>100% compliance with EU guidelines (RoHS 1, 2 & 3, WEEE)</p>	<p>Electronic assemblies cleaned with VIGON® US in a ZESTRON specified process meet the following industry standards:</p> <ul style="list-style-type: none"> ■ IPC-A-610 Visual cleanliness ■ J-STD 001 Ionic and resin cleanliness and foreign object debris ■ IPC 5704 Cleanliness requirements for bare boards ■ IPC-Hdbk-65B Guidelines for cleaning of printed boards and assemblies <p>A cleaning process using VIGON® US can help to reduce particle contamination.</p>
 <p>Extensively tested and suitable for cleaning lead-free solder pastes</p>	
 <p>MPC® Technology ensures an extremely long bath life when used in a closed loop system</p>	
 <p>Product is free of any critical substances according to SIN & SVHC lists</p>	

Environmental, health & safety regulations

- VIGON® US is water-based and biodegradable.
- VIGON® US is formulated free of any halogenated compounds and environmentally friendly.
- Refer to the SDS for specific handling precautions and instructions.

Availability & Storage

1 Liter	✓
5 Liter	✓
25 Liter	✓
200 Liter	✓

- Available as concentrate
- Store VIGON® US in the original container at a temperature between 5 - 30°C / 41 - 86°F.
- The product has a minimum shelf life of 5 years in factory sealed containers.

Further product information

- **Material Compatibility**
Please review the Material Compatibility overview before using the cleaning agent.
- **MPC® Technology Sheet**
Detailed information on MPC® Technology
- **Filter recommendation**
To take full advantage of MPC® Technology and further extend the bath life of VIGON® US, filtration is recommended.
- **Safety data sheet**

Available Process –Optimization –Products

To ensure a stable running cleaning process, it is important to monitor cleaning agent concentration and regular bath treatment. For VIGON® US a variety of process support products are available:

Concentration measurement:

- ZESTRON® EYE for automated real-time concentration monitoring providing 100% traceability,
- ZESTRON® Bath Analyzer 10 a manual test method for fast and reliable checks on cleaner concentration.

Cleaning agent regeneration:

- Adsorber HM1 allows for the adsorption of heavy metals in your cleaning process when VIGON® US is applied.
